

Inside the 2026 CPA.com Startup Accelerator Cohort

# 5 STARTUPS USING AI AND AUTOMATION TO TRANSFORM THE FUTURE OF ACCOUNTING, AUDIT, AND TAX.

# Adaptive

An AI-native accounting platform designed for construction companies.

Key capabilities:

- Combines financial data with project context
- Uses agentic AI to automate accounting workflows
- Identifies profit fade risks before they impact projects

Goal: bring real-time financial intelligence to project-driven businesses.

A suite of AI-powered tools built for audit firms.

What it enables:

- Automated audit procedures
- AI-assisted financial statement reviews
- Faster adoption of AI within audit practices

Objective: help firms deploy AI affordably and efficiently in the audit process.

# Kintsugi

An AI platform focused on global indirect tax compliance.

Capabilities include:

- Automated sales tax and VAT calculations
- Filing and remittance across jurisdictions
- Compliance infrastructure for global businesses

Designed for companies managing transaction taxes across multiple markets.

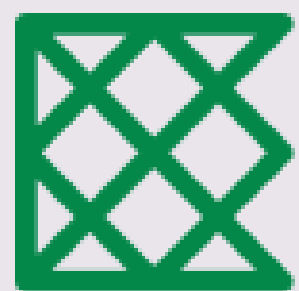

# Ping

An AI-powered intelligence platform for accounting firms.

It helps firms:

- Capture firm and client context
- Surface revenue opportunities
- Reduce administrative workload
- Gain real-time operational insights

The focus: turning data into actionable business intelligence for firm leaders.

# Truss

An AI-native tax workflow platform designed for modern tax firms.

Key functionality:

- Client intake automation
- Workpaper preparation
- Tax return preparation and delivery
- Streamlined client experience

The goal: simplify the entire tax engagement lifecycle.
